

Figure 1. Example of caption. It is set in Roman so that mathematics (always set in Roman:  $B \sin A = A \sin B$ ) may be included without an ugly clash.

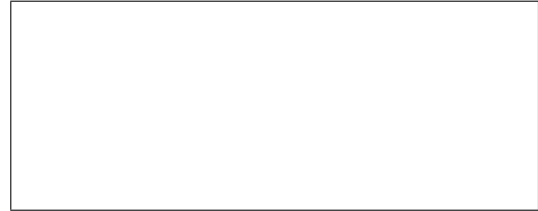

Figure 2. Caption.

The interim report should include all tutorial tasks on CNN Introduction, CNN Architectures, Evaluation measures, Network Training.

## 1. CNN Introduction: task 1

**Paper length** Interim report, excluding the references section, must be no longer than 2 pages in length. The references section will not be included in the page count, and there is no limit on the length of the references section. The references (citations) should be made to relevant slides in the lecture notes.

Each coursework task should have its section in this report. It should include outputs specified in task description e.g. figures or tables, and a discussion of each presented figure or table e.g. the main observations and their explanation.

### Figures, graphs, and photographs

All graphics should be centred. Please ensure that any point you wish to make is resolvable in a printed copy of the paper. Resize fonts in figures to match the font in the body text, and choose line widths which render effectively in print.

When placing figures in  $\text{\LaTeX}$ , it's almost always best to use `\includegraphics`, and to specify the figure width as a multiple of the line width as in the example below

```
\usepackage[dvips]{graphicx} ...  
\includegraphics[width=0.8\linewidth]  
                {myfile.eps}
```

## 2. CNN Introduction: task 2

## 3. Network Evaluation Measures: task ...

Model size (%)	Accuracy (%)	
	Hard	Soft
27%	92.62	92.43
50%	92.74	92.58
72%	X	X
90%	X	X
95%	X	X

Table 1. Table example.

## 4. Network Training: task ...
